There is no single referee above all three systems.

The court system, state DMV, and federal SSA use different authority, review paths, and oversight bodies.

Solid arrows = a possible review path. Dashed arrows = operations or oversight.

Each arrow depends on jurisdiction and procedure. Oversight is not automatically another appeal stage.

“Referee” is a useful analogy, with limits.

Ask what an office is legally empowered to change, not just whether its name includes “administrative.”

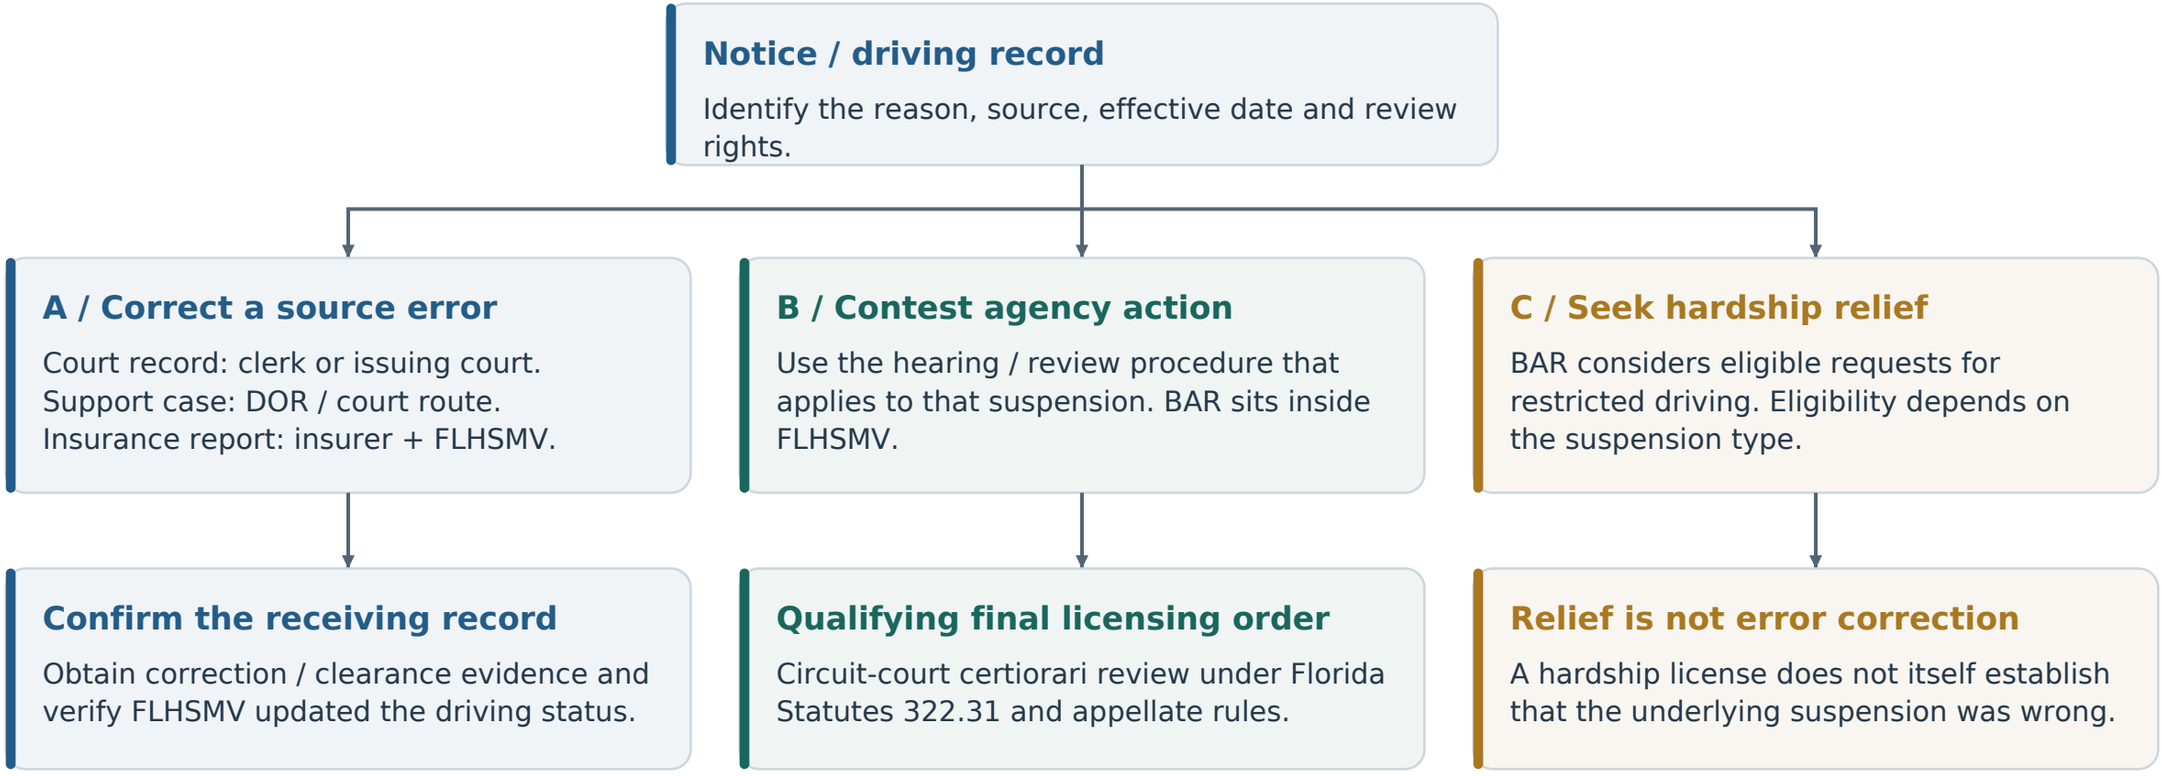

Function	Typical office	May do	Key limit
Record custodian	Agency records unit; court clerk	Correct an authorized clerical or record error	Cannot simply erase a judicial ruling
Case reviewer	Hearing officer; ALJ; appeals board	Decide or recommend relief within assigned jurisdiction	Some issue recommendations, not final orders
Reviewing court	Trial / appellate court with jurisdiction	Affirm, reverse, remand or grant authorized relief	Proper vehicle and deadlines still matter
Court administrator	Local administrator; AOC; Judicial Council	Manage filing systems, access and operations	Not an appeal court for individual orders
Oversight / conduct	Inspector general; auditor; judicial conduct body	Audit, investigate, recommend, refer or discipline as authorized	Complaint alone does not change an order
Rule / resource maker	Legislature; authorized rulemaking body	Change laws, rules, budgets and future architecture	Not ordinarily an individual case appeal

A Secretary of State has a defined state portfolio, not universal authority over courts, DMV or SSA.

Sources: S01-S15, S32. “Referee” can also be a formal judicial title; this atlas uses it only as an analogy.

Trace the suspension back to its source.

FLHSMV = Florida Department of Highway Safety and Motor Vehicles. BAR = Bureau of Administrative Reviews.

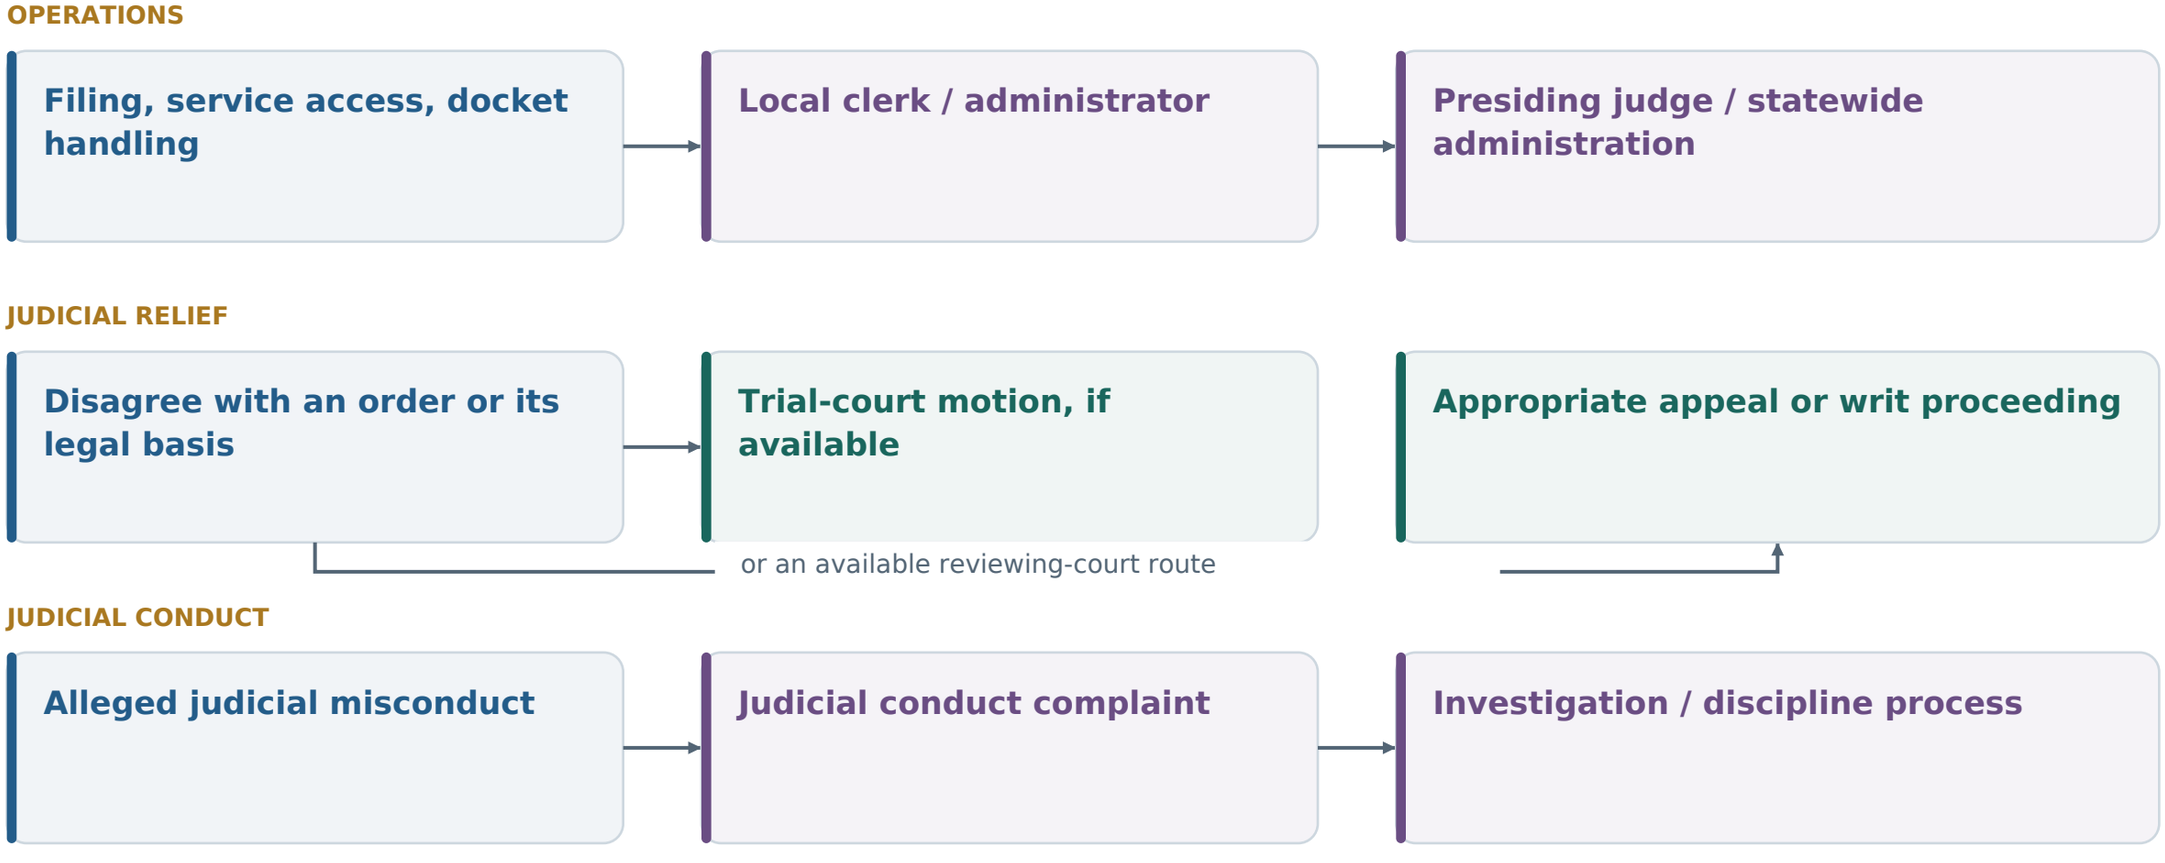

A specific limit matters

FLHSMV states child-support delinquency suspensions are not eligible for hardship consideration. Source correction and the applicable support/court route are different questions.

Sources: S01-S04. This is a routing map, not a finding that any particular suspension is invalid.

Court administration and judicial review run on different tracks.

Examples: Oklahoma courts and the Los Angeles Superior Court family-law system, including Chatsworth.

Local and statewide examples

Oklahoma AOC supports court administration. California Judicial Council supports statewide administration. LA Family Court Services provides mediation / related services; it is not an appeals office.

Sources: S05-S08, S30-S31. Administrative escalation is not a mandatory appeal ladder; conduct review is separate.

Benefits appeals and record correction are different routes.

SSA is federal. Its administrative law judges and Appeals Council belong to the agency review system.

BENEFITS DECISION

- **Initial benefits decision**
- **Reconsideration**
- **Administrative law judge**
- **Appeals Council**
- **U.S. District Court**

RECORD / IDENTITY ISSUE

Identity / card update

Evidence + SSA application. A name change generally retains the same SSN.

Privacy Act correction

Submit the specific inaccurate record and supporting evidence to its records-system manager. Earnings records use a separate correction procedure.

If refused

Administrative review of the refusal, followed by court review of the final refusal.

OIG: a separate oversight route

Audits, investigations and recommendations; not another benefits-appeal step.

Existing correction-propagation rule

20 CFR 401.65(d): SSA must correct erroneous information and notify known recipients of the wrong data. Ordinary name/address changes are different. Benefits disputes retain their appeal route.

Sources: S09-S13. Simplified paths; the applicable notice and rules determine available review.

Similar names do not mean the same jurisdiction.

Selected major examples from your text. This is a functional directory, not an exhaustive list of every hearing body.

Jurisdiction	Administrative hearing examples	Typical subject areas	Boundary
Florida	Division of Administrative Hearings (DOAH)	Assigned agency disputes; rule challenges	BAR handles its own specified DMV matters
California	OAH; Unemployment Insurance Appeals Board; OSHAB	Assigned agency / special education cases; unemployment; workplace citations	DMV Driver Safety has separate hearings
Montana	Labor & Industry OAH; Public Health & Human Services OAH	Program-specific labor, licensing and benefits disputes	Not one statewide general tribunal
Nevada	Administration Hearings Division; DMV OAH	Workers' compensation / victims' compensation; DMV matters	DMV has a distinct hearing office
New York	Industrial Board of Appeals; Tax Appeals Tribunal; NYC OATH	State tax / labor disputes; designated city administrative cases	NYC OATH is municipal, not statewide
District of Columbia	Office of Administrative Hearings; DMV adjudication	Assigned agency disputes; separate motor-vehicle matters	OAH jurisdiction is assigned, not universal

OAH = Office of Administrative Hearings. NYC OATH = Office of Administrative Trials and Hearings.

Sources: S14-S22, S33-S36. Independence does not create unlimited authority over agencies or courts.

Sector safety oversight is another part of the map.

These bodies address their assigned sectors. They are not a universal appeal route for DMV, family-court or SSA decisions.

TRANSPORT

FAA: aviation safety rules, certification and oversight.
NHTSA: vehicle / equipment standards and safety defects.
FRA: railroad safety standards and compliance.

HEALTH

FDA: regulated medical-product and food safety.
CMS: Medicare / Medicaid provider quality and safety requirements.

WORKPLACE & CONSUMERS

OSHA: workplace safety enforcement, including state-plan structures.
CPSC: consumer-product safety, recalls and enforcement within its jurisdiction.

NUCLEAR & CHEMICAL

NRC: civilian nuclear / materials licensing and oversight.
CSB: chemical-incident investigations and safety recommendations; no fines or citations.

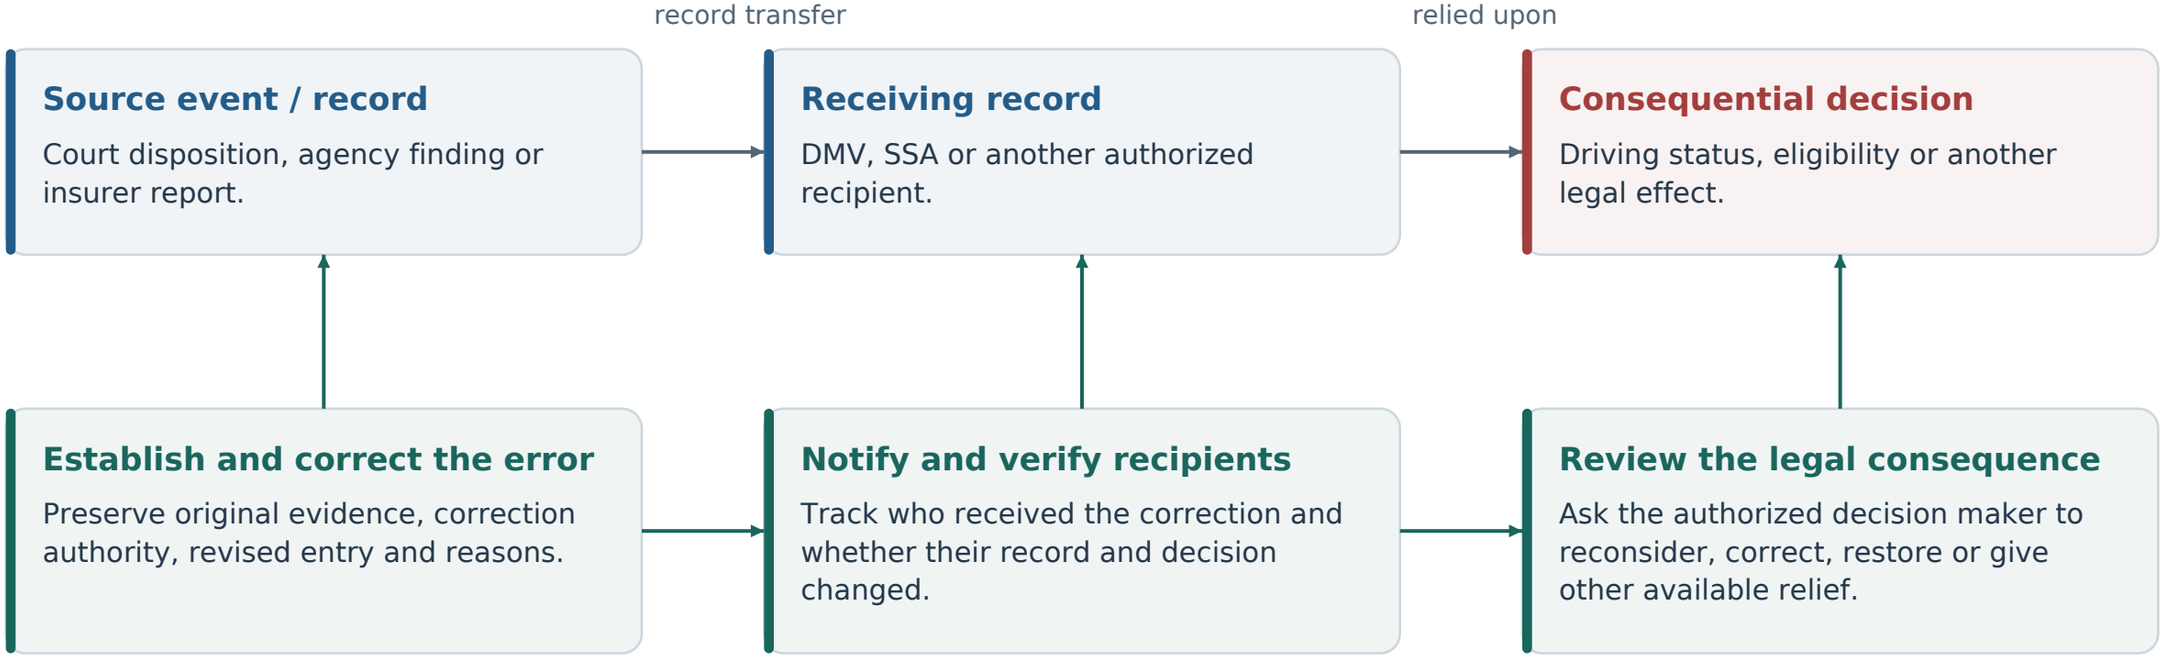

Regulation, investigation and adjudication are different powers

For example, California workplace citation appeals go to OSHAB. CSB investigates chemical incidents but does not enforce by issuing fines or citations.

Sources: S16, S23-S29. High-level sector examples; each agency has exclusions and specific statutory powers.

A corrected source is only part of a completed repair.

Illustrative data dependency, not a claim that every agency exchanges every record shown here.

REPAIR VERIFICATION

Correct source / notify recipients / confirm receipt / review consequences / verify human outcome

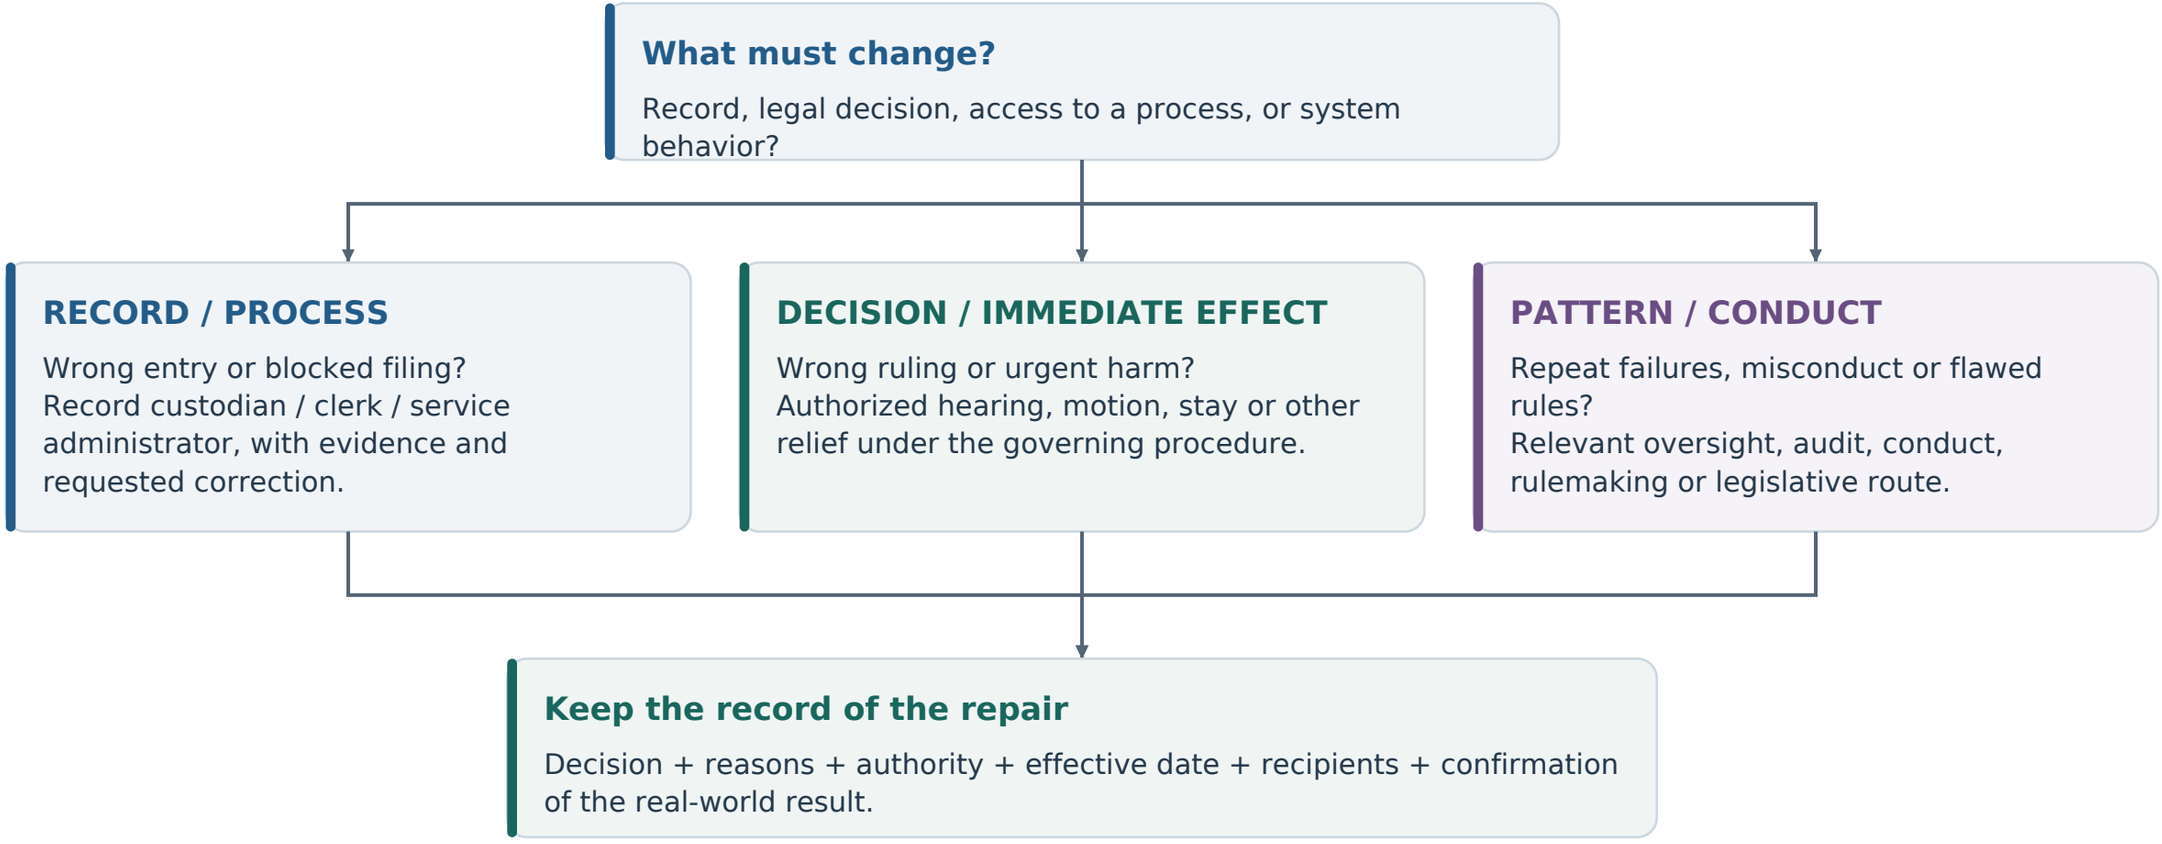

Existing example + proposed assurance practice

SSA has a known-recipient correction rule. A general cross-agency verification loop is a systems-design recommendation here, not a claim that one universal legal mechanism already exists.

Source: S10, 20 CFR 401.65(d). The broader correction loop is an explicitly labeled architectural synthesis.

Prioritize authority and urgency, not invented success rates.

Several tracks may need to run at the same time; an administrative complaint does not automatically preserve appeal deadlines.

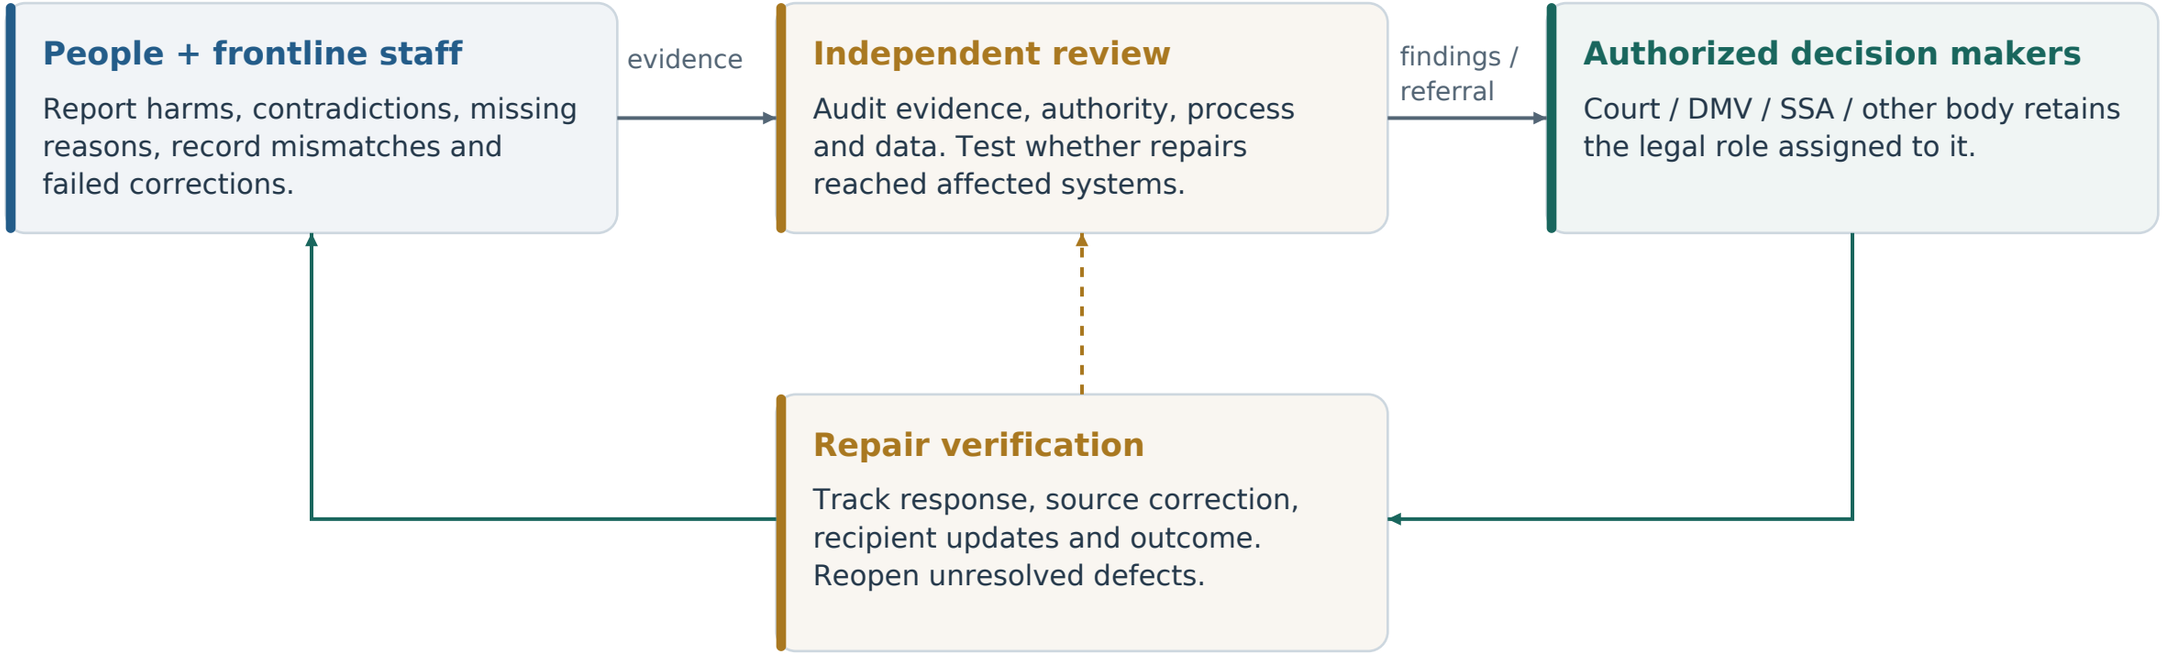

No universal “near 100%” or 24-48 hour promise

The pasted text supplied no evidence for its success rankings or emergency timelines. Availability and speed depend on the specific law, facts, forum and procedural posture.

Where a Public Systems Assurance Office could fit

DESIGN PROPOSAL: a cross-system assurance function. It is not presented as an existing office with universal jurisdiction.

Public accountability with privacy

Publish aggregate failure patterns and redacted evidence with appropriate authority / consent; protect identities and sensitive case material.

Power must be specified, not assumed

Compulsory access, deadlines, stays or binding remedies would require a lawful grant of power. A verification office cannot silently substitute for courts or statutory appeal bodies.
